

European Pain Federation Krakow Pain School Translational Pain Research: From Lab to Clinic 22-27 June 2019, Krakow, Poland

Preliminary Program

*All lectures, meetings and discussions take place at the Galaxy Hotel, ul. Gęsia 22
The only exception is a lecture and workshop for students, which will be held Sunday morning
at the Institute of Pharmacology of the Polish Academy of Sciences ul. Smetna 12.*

Saturday, June 22, 2019 - STUDENT'S DAY

12-14 - **registration of students**

*an afternoon for the integration of students, short presentations of their professional interests and
the preparation of the pro-contra debate for Round Table Discussions*

Sunday, June 23, 2019

Morning - visit in Institute of Pharmacology (for student only)

Halina Machelska Berlin

Experimental design and data interpretation in basic pain research

After lecture - workshop with methods of pain measurements in laboratory animals

15-18 - **registration of faculty members**

18.00 Opening Ceremony (Hotel Galaxy – lecture hall)

Introductory remarks:

TBA EFIC Education Committee, **Bart Morlion** EFIC President, **Jan Dobrogowski**, President of Polish Association for the Study of Pain, **Magda Kocot-Kepska**, secretary of Polish Association for the Study of Pain and Member-at-large EFIC Executive Board, **Władysław Lason**, director of Institute of Pharmacology, Polish Academy of Sciences..

Get Together

Monday, June 24, 2019

Anthony Dickenson *London*

Translational impact of basic research in the knowledge of chronic pain mechanisms

Alain Eschaliér *Clermont-Ferrand*

Reverse translational research in pain pharmacology

Eija Kalso *Helsinki*

Individual nature of responsiveness to pain treatment

Dorit Pud *Haifa*

Utility of human models in studying pain modulation

Per Hansson *Oslo/Stockholm*

Is there a gap between basic and clinical research on pain?

Round Table Discussion * and **Workshop ****

after dinner a guided walk through the old Jewish district of Kazimierz

Tuesday, June 25, 2019

Anthony Dickenson *London*

Pain-related sensitization: peripheral, central or both ?

Jürgen Sandkühler *Vienna*

Neuroinflammation, a pluripotent driver of pain hypersensitivity

Luis Villanueva *Paris*

Central mechanisms of primary headaches: translational aspects

Luis Garcia-Larrea *Lyon*

Functional exploration of the pain matrix (with brain imaging + human electrophysiology)

afternoon – free time (Krakow guided tour)

dinner for all students and faculty in a restaurant with Polish cuisine

Wednesday, June 26, 2019

Stephen McMahon *London*

Crosstalk between the nociceptive and immune systems

Alain Eschalier *Clermont-Ferrand*

Ion channels as pharmacological targets for analgesia

Thorgeir Thorgeirsson *Reykjavik*

Genetics of Pain

Stephen McMahon, *London*

Gene expression changes in spinal cord and DRG in pain

Round Table Discussion * and **Workshop** **

after diner

Luis Garcia-Larrea, Chief-Editor of European Journal of Pain short talk: “How to publish in EJP and Pain: challenges, problems and pitfalls”

TBA – information about EGG grants

followed by a longer informal discussion

Thursday, June 27, 2019

Rafael Maldonado, *Barcelona*

Why opioids have less analgesic efficacy in neuropathic pain?

Ryszard Przewlocki, *Krakow*

Can we stop pain without addiction using opiates?

Christoph Stein, *Berlin*

Peripheral opioid analgesia – successful translation of basic research?

TBA - A summary of the school

Thursday after lunch closing of the school

* students in 2 groups of 4-5 persons present arguments/literature data in pro – contra system on the topic proposed for them earlier.

** Workshop "How to plan a research project" - students before the start Schools will get a specific topic for elaborate, during the workshop they will present their plans for the experiment
